### **STATPOINT, INC. ANNOUNCES THE RELEASE OF STATGRAPHICS® CENTURION XV *MULTILINGUAL* EDITION**

July 23, 2007, Herndon, VA – StatPoint, Inc. proudly announces the release of STATGRAPHICS® Centurion XV *MultiLingual* Edition. This software allows users to communicate the results of statistical analyses interchangeably in any of these languages: English, Spanish, French or German, with Italian slated for inclusion by year's end. With STATGRAPHICS® Centurion XV *MultiLingual* Edition, the full statistical power of STATGRAPHICS® Centurion XV Professional Edition has been coupled with the linguistic power vital in today's global marketplace. Since 1980, STATGRAPHICS® software has led the way in providing powerful, intuitive software tools for statistical modeling and data analysis.

Developed with the business challenges of the global marketplace in mind, STATGRAPHICS® Centurion XV *MultiLingual* Edition facilitates cross continental collaboration and enhances productivity when one person or group speaks English and another person or group speaks another *MultiLingual* available language. Like STATGRAPHICS® Centurion XV Professional Edition, STATGRAPHICS® Centurion XV *MultiLingual* Edition is available in both standalone and network versions. With a simple mouse-click, users can select one language for menus, another for tables and graphs. Or, output can be generated in multiple languages so that everyone understands. With the STATGRAPHICS® Centurion XV *MultiLingual* Edition, users can:

- Choose one language for **INPUT**
- Choose a second language for **OUTPUT**
- Switch easily between languages for **INSTANT TRANSLATION!**

STATGRAPHICS® Centurion XV is available in both Professional and Standard Editions for single or multiple users in any of the single language choices of English, Spanish, French, or German.

STATGRAPHICS® Centurion XV *MultiLingual* Professional Edition is also offered in a *BiLingual* format with English combined with any of the other available languages (Spanish, French, or German).

Dr. Neil W. Polhemus, the lead developer of the software and Chief Technology Officer of StatPoint, Inc., states “The benefits of statistical methods in extracting information from data are greatly amplified when the analysis is performed by a subject-matter expert rather than a statistician. The goal of STATGRAPHICS® is to make a wide range of analytical methods easily accessible to as many people as possible. The STATGRAPHICS® Centurion XV *MultiLingual* Edition is an important advancement in achieving this goal, since it allows users to work in their native language, even if the final report must be generated in another language. Coupled with the StatAdvisor feature, which generates a detailed interpretation of the statistical results, the STATGRAPHICS® Centurion XV *MultiLingual* Edition creates unparalleled clarity and transparency in an extraordinary user-friendly data analysis environment.”

STATGRAPHICS® is statistical analysis software widely used by Fortune 1000 companies as well as by countless small enterprises worldwide. Its intuitive graphical interface is ideally suited for users of statistical methods who may not be professional statisticians. Important applications of the software include quality control in manufacturing, design of experiments, data analysis in research and development, monitoring of social and environmental trends, financial and economic forecasting and many others. STATGRAPHICS® is used as a valuable tool whenever there is a need for statistical analysis of data.

**QUALITY IS THE SAME IN ANY LANGUAGE.** With the revolutionary STATGRAPHICS® Centurion XV *MultiLingual* Edition, users are able to choose the language that best suits their linguistic environment while remaining in clear communication with colleagues and clients.
